

Conversor CC-CC – Boost 24V para 311V – 0,3A

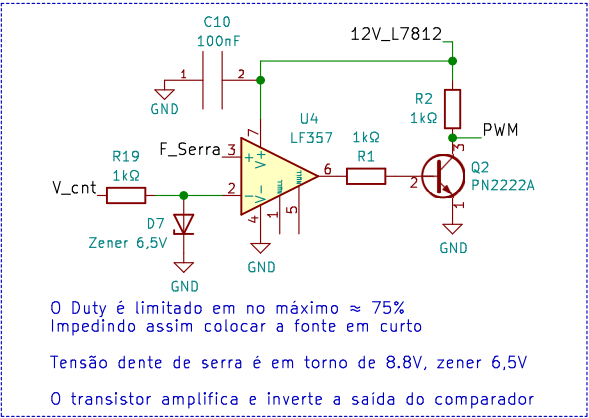

1. Alimentação 15 a 30 V para 12 V

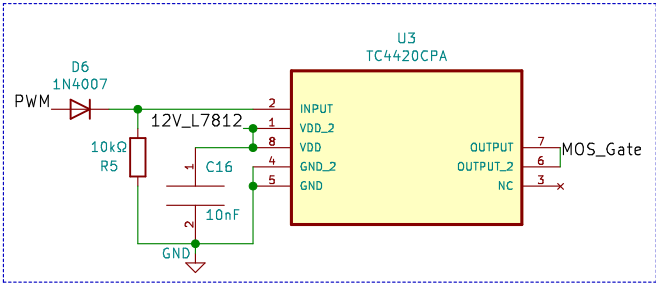

2. Onda dente de serra, $F \approx 5,5$ até 100 kHz

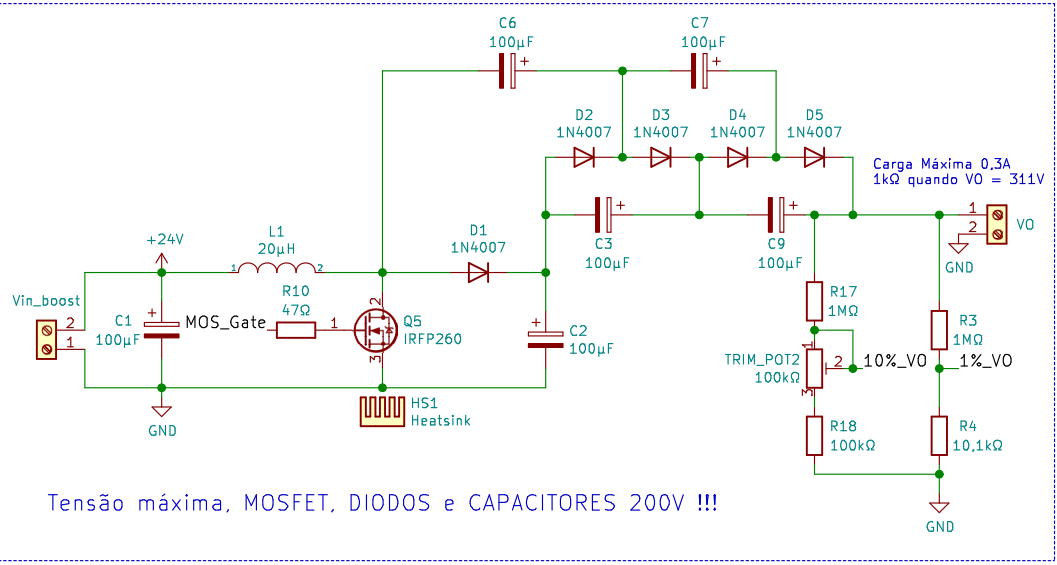

3. Comparador – Amplificação – PWM – duty 0 até 75%

4. Proteção PWM e acionamento MOSFET

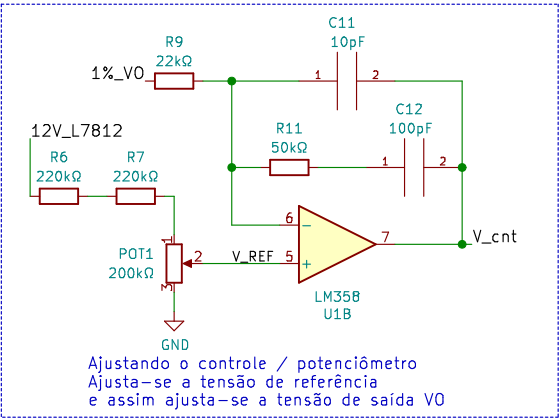

5. Boost 24V para 311V – 0,3A

Tensão máxima, MOSFET, DIODOS e CAPACITORES 200V !!!

6. Controlador tipo II

7. LM358 Alimentação e proteção OP-AMP não usado
